TRAIN ON THE POWER EDGE PRO:

- Power Edge Pro is a developmental blueprint for coaches and players to follow to build the essential skills necessary to succeed in today's game.
- PEP focuses on Reactive Countering Training™, which includes intensive speed, edge, stickhandling, agility, and balance work, in sync with the on-ice PEP gear.
- This unique training system is designed to overload the motor system, forcing the hands, feet, and mind to work in unison to build a superior all-round skill set.
- All PEP patterns are completed while maintaining puck control and are designed to deliver 5x as many repetitions as traditional skill sessions, maximizing skill improvement in less time. It's tough, but so much fun for the players!
- Connor McDavid began training on the PEP system at age 11 for three days per week. He continues to train with PEP to this day.

INCREASE the REPS and the QUALITY of REPS with our summer camp!

"I've seen definite improvements in his shot: power, accuracy, quickness, in his confidence and decision making, and in his anticipation and aggressiveness. Most importantly, he loves the game even more than he did before!" Bob Pechman, Edina, MN
